# SECTION-I

## INTRODUCTION

- 1.1 The Province of Punjab is endowed with tremendous natural resources. It is equally rich in mineral resources as in Agriculture. Out of forty seven minerals exploited in Pakistan twenty four are being exploited in Punjab. About 40500 mine workers are employed by 1400 lessees in the exploitation of minerals such as Coal, Rock Salt, Lime Stone, Gypsum, Fire Clay, Silica Sand, Sand Stone, China Clay, Fuller Earth, Dolomite, Bauxite, Bentonite, Iron Ore, Marble and Millstone etc.
- 1.2 In pursuance of implementation of National Mineral Policy-1995, the Inspectorate of Mines was detached from the Labour & Manpower Department and attached with the Industries, Mines & Minerals Department through amendment in the Punjab Government Rules of Business on 21<sup>st</sup> March, 2002. With the creation of the new Department of Mines and Minerals, the Chief Inspectorate of Mines has become its Attached Department from 1<sup>st</sup> August, 2003 through amendment in the Punjab Government Rules of Business, 1974. The Mines Labour Welfare Organization has also been shifted from the Labour & Human Resource Department to the Mines & Minerals Department under the operational control of Chief Inspector of Mines – Head of Attached Department from 31<sup>st</sup> December, 2003.
- 1.3 The main objective of the department is to ensure safety of mines and mine workers. The safety aspect is covered under the provisions of Mines Act, 1923, Coal Mines Regulations, 1926, Metalliferous Mines Regulations, 1926 and Consolidated Mines Rules, 1952. This job is performed through the regular inspections by the qualified Inspectors holding degree in Mining Engineering with relevant competency and experience. In addition to the role of law enforcing authority, Inspectorate of Mines also took the initiative of teaching, training and guidance by establishing the Punjab School of Mines, Katas, District Chakwal and Mine Survey Institute, Makerwal District Mainwali which is producing three years diploma of Associate Engineers in the field of mining with the perspective that education improves the quality and standard of work. This is a harsh fact that the mining industry in Pakistan is still in the infancy stage and a lot of input is required for upgrading the capacity, from the level of workers to the managers. To cover this deficiency, training courses at different levels are also one of the hall mark of this Inspectorate.

- 1.4 This report deals with the information relating to the activities of Inspectorate of Mines, Punjab and all types of minerals which fall within the administrative scope of the Mines Act, 1923 in the Province of Punjab except oil; gas and nuclear minerals. Besides the details of training and the different development projects and the accidents analysis is also included which provides a sound base for future planning towards safety, health and welfare of mine workers.
- 1.5 A statistical analysis of the production figures of coal, metalliferous and non-metalliferous minerals submitted through annual returns by the mining firms engaged in Punjab has been made. Information relating to certain minor minerals duly exempted from the operations of Mines Act, 1923 under Section-46 of the Act *ibid* (read with Notification No. LR-7(57) dated 16<sup>th</sup> May, 1955) is not included in this report.
- 1.6 It has been noticed that most of the mining firms dealing with stone, limestone and other minor minerals failed to submit the annual return which is mandatory on their part. This is due to the introduction of new mine owners acquiring short term mining rights through auction by the Director General Mines and Minerals. Due to the shortage of staff in the field offices, the Inspectorate has not been able to collect the complete statistics of defaulting mining firms. The defaulters, however, have been prosecuted in accordance with the provisions of law. This report therefore, covers only the data received in the office of the Chief Inspector of Mines through annual returns submitted by the mine owners.

\* Figures shown in braces represent injury in addition to fatalities.

- 2.5.3 The analysis of above table reveals that the majority of the accidents occurred due to fall of roof which was generally attributed to geological changes in the mine roofs in the vicinity of working places which was not noticed by the supervisory staff due to negligence and poor illumination caused by accumulation of smoke in the working faces through use of open-flame lamps. The timber supports used are also improper and sub-standard thereby leading to the accidents.
- 2.5.4 There were 46% of fatal accidents occurred in underground mines by electricity, fall of side, suffocation by gases, sundries underground and underground machinery including fall of roof showing 33% of fatal accidents as a major cause in underground mines.
- 2.5.5 The examination further reveals that 54% of fatal accidents occurred on surface. The causes are attributed to the fact that the small areas are auctioned on short term basis due to which the quarry owners do not develop the quarries to work systematically. On the contrary they adopt mining methods of very high quarry faces some times upto many hundreds of feet with no benches to stand for quarry workers to work safely. The quarry workers drill holes hanging on the ropes. The face is undercut causing the overhanging position to fell to save costs. The workers are hit by falling stones, sometimes they slip and fall down hundreds of feet due to non-fastening of safety ropes and other safety gear.
- 2.5.6 The examination of above table reveals that fatal accidents rate has decreased by 2% with 5% increase in death rate and serious accidents rate has decrease by 21% with 15% decrease in injuries rate during the year under report as compared to the previous year. The situation is still alarming with a loss of 63 precious lives of mine workers and the department is taking all due measures to bring this rate to minimum by induction of trained labour force in addition to enforcing the employment of proper mining methods including use of good quality timber, proper illumination, adequate ventilation and use of safety gadgets by mine workers.
- 2.5.7 It is felt that most of the fatal and serious accidents could be averted if the mining firms employ the trained labour force and adopt the safe mining practices on surface as well as underground mining operations.

Fatal Accidents in Punjab District-wise for the last five years

## 2.6. Rescue & Recovery

To handle the mine emergencies and to provide rescue facilities to the mine workers trapped in underground mines as well as open quarries, a rescue and recovery wing is operational since 1983. The following rescue stations are engaged in this function:

### 2.6.1 Mines Rescue & Safety Station, Khushab

Mines Rescue & Safety Station, Khushab is headed by Rescue Superintendent (BS-18), a qualified Mining Engineer and assisted by two Rescue Instructors (BS-17) who are also Mining Engineers. The project was commenced in 1975 and completed in 1983 at a total cost of Rs.7.907 million having a foreign exchange component of Rs. 2.380 million. The main objectives and benefits for the establishment of this Station are:

#### 2.6.1.1 Objectives

- i. To provide prompt rescue facilities to the persons involved in accidents or disasters in mines.
- ii. To train rescue teams at different mines and to help these teams during the emergencies at the mines.
- iii. To hold refresher courses for teams employed by individual mine owners.
- iv. To hold periodical exercises in mines and to acquaint workers with the changing conditions of the mines because of development work.
- v. To hold tests of competency in Rescue Operations and to grant certificates to the successful persons.

#### 2.6.1.2 Benefits

- i. Availability of timely and efficient help in cases of mine accidents.
- ii. Proper knowledge of mine rescue work.
- iii. Availability of efficient and trained workers to deal with emergencies.
- iv. Possibility of saving lives which is not possible otherwise.
- v. Reposing confidence in the mine workers for their profession.

2.6.1.3 The Mines Rescue & Safety Station is not only engaged for attending emergency calls but is also heavily engaged in training of Mining Engineers, Mining Supervisors and Mine Workers by holding Regular Rescue and Refresher Courses.

2.6.1.4 The Regular Rescue Training Course is a fifteen (15) days' course arranged for such mining engineers, supervisors and mine workers who have not get any training in the field of mines rescue. The aim of this training is to enable the mining personnel to provide prompt rescue facility to co-workers in case of any emergency.

2.6.1.5 The persons to be trained in rescue work are carefully nominated by mine owners and mine management on the grounds of their coolness of mind, power of endurance and general suitability for the work and their knowledge of mine. Every person selected for training in rescue have to undergo the course of instructions and practices through rescue apparatus and equipment. After evaluation and assessment, the trained persons are awarded a certificate by Rescue Superintendent.

2.6.1.6 The Rescue Refresher Training Course is a five (5) days' course arranged for such mining personnel who have already attended the Regular Rescue Training Course. This training is aimed to refresh the knowledge and skills of trainees through practical exercises.

2.6.1.7 The rescue courses at Khushab conducted during the last five years are as follows:

- A. There was one emergency attended at Mine No.22 owned by M/S PMDC, Salt Mine, Kalabagh near the Wanda Kukranwala, Distt: Mianwali on February 22<sup>nd</sup> 2017. The detail of which was as follows:

At 04.00 pm on February 22, 2017, upon receipt of information through a phone call that two persons namely M/s Allah Ditta S/o Muhammad Roshan and Muhammad Zaheer S/o Noor Ahmad have been trapped in the above said mine due to fall side. The Rescue Superintendent directed the Rescue Instructor Makerwal to reach immediately at accident spot .

The rescue team rushed towards the accident side. At about 7.00 PM, the rescue team reached the accident site where they were informed that the rescue team of Makerwal along with Rescue Instructor, Engr. Muhammad Shafi already reached there .

The accident occurred about 280 feet away from mine mouth. Huge boulders along with loose debris of about 150 tons in weight fell on two above said mine workers. The mine management has arranged the excavator machine for this purpose but in vain because excavator machine was not entered in the mine due to small size of mine mouth. In this critical situation the Engr. Muhammad Kabir, Rescue Superintendent in the presence of Engr. Syed Mustafa Raza, Inspector of Mines, Sargodha, Rescue Instructor, Makerwal and Engr. Muhammad Ajmal, Junior Inspector of Mines, Mianwali started the rescue operation by manual. The rescue recovery operation was kept continued by rescue teams and mine workers whole night.

After hectic and hazardous efforts of removal of loose debris/boulders the rescue team succeeded to approach one dead body of Mr. Allah Ditta who brought out to open surface successfully at 10.00 A.M. on 23.2.2017 (after 24 hours). Rescue operation remained in progress for recovery of other person. More than 60 tons fallen material was removed by manual with the help of rescue team and mine workers. The dead body of Mr. Muhammad Zaheer has been recovered and handed over to legal heirs after 28 hours.

Umar Hayat, Liaquat Ali S/o Naik Muhammad and Muhammad Usman S/o Sher Ahmad have been trapped under the fallen material.

After collecting the necessary information and getting permission from Chief Inspector of Mines, Punjab the rescue team rushed towards the accident site at about 6.45 PM, on reaching the spot, it was observed that huge boulder of sliding rock along with loose debris of thousands of tons in weight fell on three above said workers. The rescue operation was in progress with the help of following heavy machinery:

|    |                 |         |

At At 01:45 pm on November, 8<sup>th</sup>, 2017, upon receipt of information through a phone call from Mr. Mansoor Ali Shah (News Representative) about the occurrence of accident, the Rescue Instructor, Mine Rescue & Safety Sub-Station, Choa Saiden Shah and his Rescue Team left the station at 2:15 pm to proceed towards the accident site. In the meanwhile, matter had been brought to the knowledge of Chief Inspector of Mines, Punjab in addition to contact the Mine Supervisor to get the basic information of the

incident. After reaching at the mine there was no any record at the mine schedule A, B, mine maps etc. There were a Large numbers of local people gathered. The mine was about 300 feet long with a size of 4ft\*4ft hardly. The crewmen have to face the difficulty to enter in the mine with wearing the breathing apparatus BG-4. An engine was also working in-side mine. According to the mine worker petrol engine is used for the air blower in the single entry mine. The said engine has filled the mine with toxic smoke.

The rescue team consist of three persons proceeded towards face of mine where Mr.Maqsood Hussian, coal cutter was trapped, the team lift the dead body and take him on the stretcher and dragging the stretcher by sitting on the ground in the mine due to the sub standard size of the mine. At 02:40 PM the team come out.

The main hardle was the small size of the mine, that exhausted the crew works.Now an other fresh rescue team was needed to re-enter in the mine, but forcefully the crewman with a rescue driver and one person who have gained the rescue training at the Mines Rescue & Safety sub station Choa Saiden Shah motivated and he voluntarily ready to enter the mine with the rescue team wearing the Breathing Apparatus. At 03:05 PM the rescue team re-entered in the mine and come out at 03:30 PM with recovering the dead body. The dead person transported to the Mines Laboure Welfare Hospital Choa Saiden Shah District Chakwal

## 2.9 Planning & Development

Planning helps an organization to achieve its goals or objectives. The process begins with reviewing the current operations of the organization and identifying what needs to be improved operationally in the upcoming years. Planning involves envisioning the results the organization wants to achieve and determining the necessary steps to arrive at the intended destination. After a strong planning, the process of development takes place in terms of systematic use of scientific and technical knowledge to meet specific goals. This department has established a wing for planning and development of mining sector i.e. Mining Development Cell.

## INITIATIVES

### 5.1 Annual Task Calendar

Each field office has designed its Annual Task Calendar showing various activities to be carried out throughout the year matching with time. The same practice has also been extended to the branch level at Headquarters office which is much helpful for channelization of activities among different branches, projects and field offices.

### 5.2 Targets Setting and Close Monitoring of Office Work

Each functional unit of the Inspectorate is assigned full year targets on the basis of “Annual Task Calendars” made by field officers and branch heads of the Headquarters office. The performance of each branch is reviewed in monthly target evaluation meetings and completion level of each task is evaluated with percentage marks. This brings consistency in self-responsibility amongst the employees of the department and ensure quick disposal of official assignments. The target achievements during the year under report remained between the limits of 77% to 99% detail of which is enclosed as Annexure 23 to 34.

### 5.3 Organized Touring

The functions of the Inspectors of Mines are regulatory and require mine inspections and inquiries into accidents. To have a check on field staff, the routine inspections and touring of all officers is organized by assigning them the areas to be inspected in a year on monthly basis and also the days of inspection in each week are fixed. This brings close monitoring of the field staff, organized inspection of mines and completion of targets fixed for each officer as well as disposal of Labour Complaints. Tour Rosters are enclosed as Annexure-35 & 36.

### 5.4 Mining & Ecology

Mining has generally been considered as an eco-enemy but this department feels that it can be made eco-friendly by providing organized regular plantation programs at departmental projects and also at mines. This campaign was found successful. Likewise the waste disposal and control on affluent from mines, noise and emission of smokes due to spontaneous heating was also being controlled.

### 5.5 Attitude of the Officers and Staff

The inspecting staff was not only told to shift their attitude from coercive measures to adopt a facilitating role but also required to demonstrate. During their inspections they should shift their strategy from fault finding to fact findings and also to suggest remedies for corrective operationality. The Counseling of Mine workers during the course of inspections has been made as the basis of inspection.
